

Green and Healthy Schools Academy Programming

Opportunities for Educators:

School Sustainability Culture Program Workshops: Whether you are brand new to school sustainability or consider yourself an expert, this is your chance to learn hands-on solutions for integrating sustainability into your culture, building, and curriculum. These workshops are open to the public with breakfast and lunch provided.

Socially Engaged Art and Advocating for Healthy Schools Featuring Mel Chin

Friday October 4th 8:30-3pm ([Register Here!](#))

Sustainability 101: What are the Components of A Green & Healthy School?

Tuesday, December 10th 8:30-3pm ([Register Here!](#))

National School Sustainability Culture Retreat-- Summer 2020

As a culmination of these workshops throughout the school year, we will be launching our first School Sustainability Culture Program Retreat! All K-12 teachers, administrators, and non-traditional educators are invited to learn about integrating sustainability into their culture. [Submit your interest and learn more here.](#)

Teacher Cohorts K-12 teachers interested in integrating climate change education into their curriculum should join our Project Drawdown or United Nations Sustainable Development Goals cohort. This paid opportunity has limited openings for K-12 classroom teachers in both Pittsburgh and West Virginia. Submit your [application](#) or contact [Katie Lockley](#) for more info.

Opportunities for School Building Professionals:

Greener and Healthier: Establishing a Green Cleaning Program

Tuesday, November 5th 8-12pm ([Register Here!](#))

Learn to create a healthy and safe learning environment through a green cleaning program while balancing financial obligations. This workshop will cover

the primary components of an indoor air quality management plan and how to set up and maintain a green cleaning program.

Pittsburgh 2030 District Affiliate Program Schools interested in reducing their energy usage and saving money can join the Pittsburgh 2030 District Affiliate Program. This free program does more than just benchmark buildings—it gives school leaders and facility managers individualized energy reports, access to Bridge to 2030 events for innovative energy saving methods, and free technical assistance. For more information, contact [Ellen Conrad](#).

Opportunities for Students:

Emerging Youth Program The Emerging Youth Program is a free, monthly program for high school students. Students explore the city and see how Pittsburghers are implementing the [United Nations Sustainable Development Goals \(SDGs\)](#) in their work. Applications are rolling until the end of August 2019. [Apply here!](#) Contact [Ellen Conrad](#) to learn more about student opportunities.
